

**AMENDMENTS TO THE SPECIFICATION**

Please replace the paragraph at page 3, lines 9-13 with the following amended paragraph:

The formulation is an organic mixture comprising greater than 95 percent aliphatic hydrocarbons. The term "Aliphatic hydrocarbons", as used herein, refers to a group of organic compounds (containing only carbon and hydrogen) characterized by straight-chain and/or branched-chain (not cyclic) of the constituent carbon atoms, including the paraffins (alkanes), olefins (alkanes or alkadienes), and acetylenes (alkynes).
